

Lean Transformation Delivers Increased Revenue, Improved Margins and an Invigorated Workforce for U.S. Retailer

This Taylor Corp company was faced with excessively long e-commerce delivery times and margin erosion due to increased competition. The business markets, manufactures and distributes the majority of its products. The company transformed the way it did business for its core product lines by using proven techniques and expert facilitation by NLP's best-in-world Practitioner Partners. The results speak for themselves. Not only did the company experience significant operational and financial performance gains, but they also benefited from a learn-by-doing approach and the knowledge transfer provided by NLP.
